British Microlepidoptera

The Microlepidoptera in this display were recorded from my coastal garden in Middleton-on-Sea, West Sussex, (SU 982004 [VC13]). They have been identified whilst working through a backlog of voucher specimens and are all additions to the growing list of species for the site.

Unless stated otherwise, all came to a 125w MV trap.

***Caloptilia alchimiella* (Scop.)**, [15.008], 19.viii.2021

***Batia lunaris* (Haw.)**, [28.015], 18.vii.2021, 40w Actinic trap

***Argyresthia pruniella* (Clerck)**, [20.021], 25.vi.2020

***Argyresthia brockeella* (Hübner.)**, [20.011], 25.vii.2014

***Cochylis molliculana* (Zell.)**, [49.138], 1.viii.2020
